# Purchase Startkit Premium

You can freely use this template for your personal & commercial projects. If you are looking to customize this template or integrate it with other backends like Ruby on Rails, Node.js etc, I would recommend that you take a look at the **Premium version of this template**. You can purchase that for $15 from my website and purchasing it will give you the following benefits -

- **Gulp based tooling** - It comes with Gulp tasks this will take care of converting SCSS to CSS, concatenating & minifying CSS & JS files and creating a production-ready build.
- Easier customization using a **built in development server with Live Reload & BrowserSync**. Your changes will be instantly reflected in the browser.
- Nunjucks based templating system - **no need to copy the same changes across multiple HTML files**.
- **Full SCSS source code** with nicely organized modules
- Pre-built **integrations with Ruby on Rails and Node.js** (Express) backends to get you up to speed really quick.
- **6 PSD files** for quickly changing mockups images that are used in the demo (e.g: showcasing your product screenshot on a Macbook/iPad/Browser window mockup)
- **Priority email support.**
